

# Navy Wounded Warrior Program

Navy Wounded Warrior coordinates the non-medical care of seriously wounded, ill and injured Sailors and Coast Guardsmen and provides resources and support to their families and caregivers. Regional non-medical care providers tailor support to each enrolled service member's recovery, rehabilitation and reintegration needs. The program allows service members and their families to focus on recovery without distraction.

**To date, more than 12,000 wounded, ill and injured service members located throughout the country have received assistance from Navy Wounded Warrior.**

**Sponsors can expect that 100% of their support will help the program execute and enhance their mission of serving our wounded warriors, their families and caregivers.**
